EVAN FOO

DIGITAL MARKETING | BUSINESS SYSTEMS | AI-ASSISTED IMPLEMENTATION

+65 8793 0973 | Portfolio: evan-portfolios.vercel.app

PROFILE

Digital marketer with experience in product content, websites and sales support. I also build internal business tools using AI-assisted coding, from understanding user needs and planning workflows to testing and improving working features.

SKILLS

Business Systems & AI-Assisted Implementation: Understanding user needs, mapping workflows, building internal tools with AI coding assistants, testing, troubleshooting and making improvements.

Digital Tools & Development: Product data and search, purchase order and shipment workflows, Shopify Liquid, landing pages, basic API integration and website updates.

Digital Marketing: Product positioning, catalogues, social media content, short videos, campaign materials, basic SEO and GA4.

Creative: Adobe Creative Cloud, Canva, CapCut / Jianying and AI-assisted creative tools.

WORK EXPERIENCE

Digital Marketing Executive | Ty Innovations Pte Ltd | Apr 2024 - Present

- Developed TyOS, an internal tool bringing together product search, purchase order records and incoming shipment tracking.
- Worked from everyday staff needs to plan features, build them using AI-assisted coding tools, and test and refine the results.
- Help make product information easier for sales and operations teams to find and follow up.
- Prepare product catalogues, product pages, presentations and sales materials based on technical specifications.
- Create social content, short videos, landing pages, Shopify updates and campaign materials.

Senior Graphic Designer | Star Publishing Pte Ltd | Jan 2018 - Mar 2024

- Designed educational publications, book covers, illustrations, page layouts and marketing materials.
- Worked with editors and production teams on artwork preparation, print quality and deadlines.

FREELANCE WORK

Multimedia & Digital Marketing Projects | Project-based | Jan 2017 - Present

Build landing pages, promotional videos and social assets for small businesses. Work with clients on requirements, revisions and delivery. One service page included WhatsApp enquiries, basic SEO and GA4; the client later reported more appointment enquiries.

SELECTED PROJECTS

TyOS - Internal Business Operations Tool | Built & deployed

Built a shared tool for purchase orders, incoming shipments and product information previously handled across separate files and conversations. Identified staff needs, planned workflows, built features with AI-assisted coding and tested real use cases. Includes per-product shipment tracking and searchable product records.

Visual Inventory & Bundle Planning | Internal Tool

Created a planning interface to review product information, stock, bundle prices and estimated margins. Results are estimates based on provided inputs.

Shopify Website Updates

Updated layouts, navigation, reusable sections and product feature labels for a commercial refrigeration storefront using Shopify Liquid.

Service Landing Page

Built a service page with WhatsApp enquiries, basic SEO and GA4 tracking. The client later reported more appointment enquiries.

Singapore F&B; Sales Intelligence | Prototype

Designed a filterable lead-review dashboard concept to help review potential F&B; businesses from different sources.

AI-Assisted Social Reels

Produced event and promotional short videos, using AI-generated materials where helpful and editing the final output.

EARLIER EXPERIENCE

Graphic Designer | Tomato Advertising (M) Sdn. Bhd. | Sep - Dec 2017

Created branding, advertising graphics, campaign artwork, signage and design materials based on client briefs.

EDUCATION & TOOLS

Education: Bachelor's Degree in Advertising (2017); GCE O-Level (2012)

AI-assisted development: ChatGPT, Gemini, Claude Code, AI coding workflows; basic API integration; exploring n8n

Marketing & design: Shopify Liquid, GA4, Adobe Creative Cloud, Canva, CapCut / Jianying

Languages: English and Chinese
